

An established leader in security consulting, Advanced Network Solutions provides clients with strategic consulting, advisory services, training and implementation. Our security professionals offer the experience and expertise to identify potential vulnerabilities and recommend effective long-term security measures.

### **Rapidly Changing Security Threats**

Modern technology is enabling business communication in ways never before imagined. But with the advances come new and potentially devastating threats. The changing landscape of security vulnerabilities, risks and the measures available to counter such threats are also rapidly changing. As a result, keeping up with the latest developments is becoming increasingly demanding on internal resources.

Triple Application provides manageable, flexible and cost-effective security solutions tailored to meet your specific security needs. At Triple Application, we understand what it takes to address the problem of rapidly changing security risks. Our highly trained and helpful engineers can implement your solution quickly and with minimal network interruption.

### **Network Security as a Process**

In order to create a secure environment for users to perform critical functions, Triple Application approaches network security as a process. We begin by taking inventory of all potential vulnerabilities including unauthorized access, misuse, malfunction, modification, destruction and improper disclosure. We then initiate a regimented process designed to remediate these

vulnerabilities utilizing a powerful suite of products and services including physical hardware and software preventative measures.

From initial planning and concept stages to full operational status of a network security project, Triple Application provides your organization with a team of highly qualified security engineers to ensure data privacy and peace-of-mind.

. **Growing Security Threats** Increased attack sophistication, increased complexity of systems, increased storage of critical data, increased liability from security incidents and more underscore the importance of preventative network security measures.

.  
**Exhaustive security measures ensure the safety of both company and client data. Triple Application' comprehensive security services include:**

- Access/Audit Controls
- Remediation Services
- Anti-Virus/Spyware Protection
- Email/Web Content Filtering
- Encryption Systems
- Firewall Management
- Intrusion Detection/Prevention
- Virtual Private Networks (VPNs)
